Technologies Shaping India's Future

Over the past decade, India has undergone a profound technological transformation. Once seen primarily as a vast market for digital products and services, the country is increasingly emerging as a creator of technology, a hub of innovation, and a trusted partner in global digital development. Through sustained investments, mission-driven programmes, and large-scale digital infrastructure, India is building the technological foundations of *Viksit Bharat 2047*.

This transformation rests on three interconnected pillars: expanding national capacity, strengthening technological capability, and enhancing global credibility. From artificial intelligence and semiconductors to quantum technologies, supercomputing, cloud infrastructure, and biotechnology, India is developing the ecosystems required to lead in the technologies of the future.

Digital India: The Foundation of Transformation

The Digital India programme, launched in 2015, has been the backbone of India's technology journey. Massive investments in connectivity have expanded optical fibre coverage from 19.35 lakh route kilometres in 2019 to over 42 lakh route kilometres in 2025. India has also achieved one of the world's fastest 5G deployments, with services reaching nearly every district.

The impact has been transformative. Internet connections grew from 25 crore in 2014 to over 102 crore in 2026, while broadband subscriptions expanded from just 6 crore to nearly 100 crore. Affordable data has been equally important. Average monthly data consumption surged from 61 MB in 2014 to more than 24 GB by 2025, while data prices fell dramatically.

This combination of connectivity and affordability brought millions into the digital economy, enabling online education, telemedicine, digital payments, e-commerce, and e-governance. It also created the foundation on which emerging technologies such as AI, cloud computing, fintech, and blockchain could flourish.

discovery, and artificial intelligence. Recognising its strategic importance, India launched the National Supercomputing Mission in 2015.

Today, 38 supercomputers with a combined computing capacity of 47 petaflops have been deployed across leading institutions. A major milestone has been the development of the indigenous PARAM Rudra series, demonstrating India's growing self-reliance in high-performance computing.

Creating a Semiconductor Ecosystem

Semiconductors power everything from smartphones and automobiles to defence systems and AI applications. To strengthen technological sovereignty, India launched the Semicon India Programme in 2021 with an outlay of Rs. 76,000 crore.

The initiative supports chip design, semiconductor manufacturing, packaging, testing, research, and talent development. Building on this foundation, the India Semiconductor Mission 2.0 announced in the Union Budget 2026-27 focuses on equipment, materials, intellectual property, supply chains, and advanced manufacturing.

The Design Linked Incentive Scheme has emerged as a key driver of India's fabless semiconductor ecosystem, supporting startups, MSMEs, and research institutions. As of March 2026, 24 companies had received fiscal support, while more than 100 applicants gained access to advanced design tools. Several chips, including advanced

12-nanometre designs, have already been fabricated.

By June 2026, projects worth nearly Rs. 1.64 lakh crore had been approved under the semiconductor mission, creating the foundations of a domestic manufacturing ecosystem.

The Quantum Leap

Quantum technology is expected to revolutionise computing, communications, sensing, and cybersecurity. Recognising its strategic significance, the Government approved the National Quantum Mission in 2023 with an outlay exceeding Rs. 6,000 crore.

The mission focuses on quantum computing, communication, sensing, and materials while supporting research infrastructure, startup development, and talent creation. Four thematic hubs have already been established, bringing together researchers and institutions across the country.

India has demonstrated a secure quantum communication network spanning 1,000 kilometres—an achievement reached years ahead of schedule. The foundation stone for India's first Quantum Valley in Amaravati further signals the country's long-term commitment to becoming a global quantum leader.

India's AI Revolution

Artificial Intelligence is reshaping economies worldwide, and India is positioning itself as a major AI powerhouse. The IndiaAI Mission, approved in 2024 with an outlay of over

Rs. 10,300 crore, seeks to build indigenous AI capabilities while ensuring responsible and inclusive deployment.

The mission is developing large-scale computing infrastructure, expanding access to Graphics Processing Units (GPUs), supporting AI startups, and promoting research and skilling. A common computing facility with more than 38,000 GPUs is being established to democratise access to advanced AI resources.

India's startup ecosystem reflects this momentum. The country hosts approximately 1.8 lakh startups, with a large share of newly established ventures integrating AI solutions. Meanwhile, AI Kosh provides thousands of datasets and hundreds of AI models across multiple sectors, enabling innovation at scale.

Strengthening Cloud Infrastructure

Cloud computing has become indispensable for governance, business

Technologies Shaping India's Future

operations, and digital service delivery. India's indigenous cloud ecosystem began with MeghRaj, the national cloud platform launched by the Ministry of Electronics and Information Technology.

Through MeghRaj 2.0, the government has adopted hybrid cloud architecture while strengthening cybersecurity and data sovereignty. By June 2026, more than 2,300 government departments were using the platform, powering services such as DigiLocker, MyGov, and the National Scholarship Portal.

Recent policy measures, including tax incentives and simplified approvals, are expected to accelerate investments in cloud and AI infrastructure.

Blockchain for Trusted Governance

Blockchain technology offers secure, transparent, and tamper-resistant record-keeping. Through the National Blockchain Framework launched in 2021, India is building a scalable and interoperable blockchain ecosystem for governance and public services.

Several indigenous platforms, including the Vishvasya Blockchain Stack and the National Blockchain Portal, have been developed. Applications already support property records, judiciary systems, document verification, and supply-chain monitoring.

More than three crore property documents have reportedly been verified through blockchain-enabled systems, helping reduce fraud and improve transparency. Blockchain is also being used by institutions such as the RBI and telecom regulators to enhance trust and security in digital transactions.

Data Centres: Powering the Digital Economy

As digital services expand, data centres have become critical infrastructure. India's data-centre capacity has grown nearly fourfold, from around 375 MW in 2020 to approximately 1,500 MW by 2025.

Major hubs have emerged in Mumbai, Hyderabad, Bengaluru, Noida, and other cities, while new hyperscale and AI-focused facilities are being developed across several states. These centres support cloud services, AI applications, digital governance platforms, and future technologies, strengthening India's digital sovereignty and economic competitiveness.

Biotechnology and the Bioeconomy

Biotechnology is emerging as another pillar of innovation-led growth. Govern-

ment initiatives such as the National Biopharma Mission, BioE3 Policy, BioNEST incubators, and various startup-support programmes have accelerated research, entrepreneurship, and bio-manufacturing.

India's biotechnology sector crossed the USD 150 billion mark ahead of target and reached approximately USD 190 billion by 2026. A network of bioincubators across the country is nurturing startups and research-driven enterprises, positioning biotechnology as a major contributor to future economic growth.

Investing in People and Research

Technology leadership depends not only on infrastructure but also on talent, research, and innovation. India has therefore focused heavily on strengthening human capital.

Strengthening Research Ecosystems

The Anusandhan National Research Foundation (ANRF), operationalised in 2024, promotes collaboration among academia, industry, startups, and government institutions. Its programmes support high-impact research in frontier technologies and facilitate the translation of laboratory innovations into practical applications.

Complementing these efforts is the Research Development and Innovation Scheme, launched with a corpus of Rs. 1 lakh crore to support private-sector research in deep-tech and strategic sectors.

Together, these initiatives are helping bridge the gap between scientific discovery and industrial innovation.

Skilling for the Future

India's technology ambitions require a future-ready workforce. Programmes such as FutureSkills PRIME have become central to this effort, offering training in AI, cybersecurity, blockchain, IoT, data analytics, and other emerging domains.

By March 2026, more than 27 lakh learners had registered on the platform, with a large proportion coming from Tier-2 and Tier-3 cities. This reflects the democratisation of technology education beyond major metropolitan centres.

The National Institute of Electronics and Information Technology (NIELIT) has further expanded digital skilling through an extensive network of centres and affiliated institutions. Its training programmes cover AI, cloud computing, cybersecurity, electronics manufacturing, and other advanced technologies.

Building AI Talent

To strengthen India's AI leadership, the Government established four Centres of Excellence focusing on healthcare, education, agriculture, and sustainable cities. These institutions are already developing practical applications, including disease-detection tools, climate-smart agriculture solutions, and intelligent urban-management systems.

The Skilling for AI Readiness (SOAR) programme complements these efforts by introducing AI literacy to school students and educators. Through industry partnerships and online learning platforms, the initiative is expanding access to AI knowledge across the country.

Creating Semiconductor Talent

The Chips to Start-up (C2S) Programme addresses one of the most critical challenges in semiconductor development: skilled manpower.

Designed to create tens of thousands of industry-ready professionals, the programme supports advanced research, startup incubation, patent generation, and chip-design training. Shared design infrastructure, industry-led programmes, and collaborative research initiatives are helping build a robust semiconductor talent pipeline.

Growing Global Credibility

India's technological progress is increasingly reflected in global recognition and partnerships. The country rose from 81st position in the Global Innovation Index in 2015 to 38th in 2025, highlighting improvements in innovation capacity, entrepreneurship, and research ecosystems.

India's standing in the Network Readiness Index has also improved significantly, reflecting advances in digital infrastructure, connectivity, and technological preparedness.

The rapid expansion of Global Capability Centres further demonstrates international confidence in India's talent and innovation ecosystem. More than 2,100 GCCs now operate in the country, employing around 2.36 million professionals and increasingly serving as strategic innovation hubs rather than back-office operations.

India is also shaping the future of telecommunications through the Bharat 6G Alliance, which brings together industry, academia, and government stakeholders to advance indigenous 6G research and development.

At the international level, the Ministry of External Affairs' New, Emerging and Strategic Technologies Division is strengthening technology diplomacy

and helping shape global governance frameworks for frontier technologies.

Major international events such as SEMICON India 2025 and the India AI Impact Summit 2026 have reinforced India's reputation as a trusted technology partner. The AI Summit, attended by delegations from more than 100 countries, resulted in the adoption of a declaration supporting responsible and inclusive AI while attracting substantial investment commitments.

India's Global Leadership in Digital Public Infrastructure

Perhaps India's most visible technological success story is its Digital Public Infrastructure ecosystem, commonly known as India Stack.

Platforms such as Aadhaar, UPI, DigiLocker, CoWIN, UMANG, and GeM have transformed public service delivery by providing digital identity, payments, documentation, healthcare access, and government services at population scale.

These platforms have become global reference models for inclusive digital governance. India has signed agreements with numerous countries to support cooperation in Digital Public Infrastructure, while UPI has expanded to several international markets.

By demonstrating how technology can be deployed securely, affordably, and inclusively for over a billion people, India has established itself as a global leader in digital governance.

The Road Ahead

India's technological rise is not the result of a single programme or breakthrough. It is the outcome of a sustained national effort to build infrastructure, nurture talent, strengthen research, encourage innovation, and create trusted digital systems.

The country's journey from a large digital market to an emerging technology power reflects a broader shift in ambition—from technology adoption to technology creation. Investments in AI, semiconductors, quantum technologies, biotechnology, cloud infrastructure, and advanced research are creating the foundations of long-term economic growth and strategic resilience.

As India advances towards the goal of *Viksit Bharat 2047*, technology will remain a central driver of transformation. The challenge now is not merely to keep pace with global innovation, but to help define its future. Increasingly, India is demonstrating that it is ready for that role.

Eligible candidates will have to appear for All India based Online Selection Test. Based on category wise merit and number of vacancies, candidates will be shortlisted for document verification/further selection process. The test will consist of two parts - Subject Knowledge test and Executive Aptitude Test. The candidates must qualify separately in both the parts.

PLACEMENT & SERVICE BOND

The selected candidates will undergo one-year training at various places. The final place of posting will be decided after completion of training & this posting shall be at any of the Stations/ Projects/ JVs/ Subsidiaries of NTPC. All posts are transferable at the sole discretion of the Management.

The selected candidates who belong to General, EWS and OBC categories will be required to execute a service bond of **Rs. 2,50,000/- (Rs. 1,25,000/- for candidates belonging to SC, ST, PwBD categories)** to serve the company for at least 3 years after successful completion of one-year training.

GENERAL CONDITIONS

- Only Indian Nationals are eligible to apply.
- All qualifications should be from Universities / Institutions recognized and approved in India.
- All computations of age, qualification etc. shall be done w.r.t. the last date of receipt of online application as mentioned in the advertisement. The date of declaration of final result / issuance of final semester marksheet shall be deemed to be the date of acquiring the qualification and there shall be no relaxation on this account. Final year/semester students who expect their results by 31.07.2026 may also apply. However, they must be able to produce final marksheet/provisional degree/course completion certificate with applicable marks % criteria on/before 31.07.2026.
- Candidates must choose a test center/city for online selection test. However, NTPC reserves the right to cancel or add any center depending on the response of the candidates for that area / center.
- Category (SC / ST /OBC/ PwBD) once filled in the online application form will not be changed and no benefit of other category will be admissible later. Candidates claiming to belong to a particular category should necessarily have the applicable year's/valid EWS/OBC/SC/ST/Disability certificate, as the case may be, from the Competent Authority (in the latest prescribed format of Government of India). Where there is a vacancy identified for such category, upper age limit is relaxed by 5 years for SC/ST candidates, by 3 years for OBC

candidates, by 10 years for PwBD candidates. Relaxation of age to Ex-Serviceman will be as per Govt. guidelines.

- Depending on the requirement, the Company reserves the right to cancel / restrict / curtail / increase the number of vacancies, if need arises, without any further notice and without assigning any reason thereof.
- While applying for the post, the applicant should ensure that he / she fulfills the eligibility and other norms mentioned above, as on the specified dates and that the particulars furnished are correct in all respects. In case it is detected at any stage of recruitment that a candidate does not fulfill the eligibility norms and / or that he / she has furnished any incorrect / false information or has suppressed any material fact(s), his/her candidature will stand automatically cancelled. If any of the above shortcomings are detected even after appointment his / her services are liable to be terminated without any notice. Canvassing in any form shall disqualify the candidate.
- The mere fact that a candidate has submitted application against the advertisement and apparently fulfilling the criteria as prescribed in the advertisement would not bestow on him/her the right to be considered further for the selection process.
- Any proceedings in respect of any matter of claim or dispute arising out of this advertisement and / or an application in response thereto can be instituted only in Delhi and courts / tribunals / forums at Delhi only shall have sole and exclusive jurisdiction to try any such cause / dispute.
- In case of any ambiguity/dispute arises on account of interpretation in versions other than English, the English Version will prevail.

HOW TO APPLY

- Candidates need to apply online on our website careers.ntpc.co.in or visit careers section at www.ntpc.co.in with a valid email id.** The E-mail ID entered in the online application form must remain valid for at least next one year. No change in the E-mail ID will be allowed. All future correspondence would be sent via E-mail only.
- Candidates will be required to upload all the required documents at the time of applying (as listed under at #6).
- After successful application, the system will generate a **unique application number**. Candidates are required to **download the application slip** and save/keep the printout of the application slip, which will be generated by the system after successful application, for all future correspondence.
- Candidates belonging to General/EWS/OBC category are required to pay a non-refundable application fee of Rs. 500/-. The **SC/ST/PwBD/XSM category and female candidates need not pay the application fee**. The payment can be made either in **online or offline mode**.
 - Payment in offline mode:** State Bank of India has been authorized to collect the application fee, in a specially opened account (No. **30987919993**) at CAG branch, New Delhi, on behalf of NTPC. Candidate must approach the nearby SBI branch with a printout of the "pay-in-slip" which is available on the application portal. The pay-in-slip printed from the portal should only be used for depositing the fee for proper crediting of amount in the allocated account. On receipt of the money, the bank will issue a unique Journal Number and a Branch Code of the bank collecting the money. This journal number and the branch code are to be filled up by the candidate during the online application. NTPC will not be responsible if the candidate deposits the fee in the wrong account.
 - Payment in online mode:** Candidate also have the option to pay the fees online (through Net banking / Debit Card / Credit Card). The online payment option will be available in the online application form.
- Fees once paid will not be refunded under any circumstances. **Candidates are therefore requested to verify their eligibility before paying the application fee.**
- Uploading of Documents: The candidates should necessarily upload all documents while applying. Applications with incomplete/insufficient documents are liable to be rejected/not considered for further process.** Sequential List of documents is given here:
 - Class X Passing Certificate or Marksheet for Name/DOB proof (name must appear in conformity in all the documents)
 - Copy of PAN Card
 - M.Sc. (Chemistry) Degree-Final/Provisional certificate (last issued marksheet needs to be submitted by appearing candidates if the final result is yet to be declared; however, such candidates will only be considered for selection if they are able to submit the prescribed final/provisional degree dated 31.07.2026 or before). In case the specialization mentioned in the Degree/ Provisional degree is in variance to the degree requirement advertised, institute's degree equivalence certificate must be uploaded
 - Final year or Consolidated Marksheet/Transcript clearly indicating aggregate % of marks in all semesters.
 - Marks conversion formula from the University/Institute for conversion of marks in CGPA/CGPI/DGPA/CGI/CPI etc. into percentage (%): A conversion formula is not required if the marks are already awarded in percentage.

India Strengthens Airport Health Checks with AIR SUVIDHA 2.0 Amid Ebola Emergency

The Ministry of Civil Aviation, in partnership with Delhi International Airport Limited (DIAL), has launched AIR SUVIDHA 2.0, an upgraded contactless health self-declaration portal for international passengers arriving in India amid the ongoing Ebola outbreak in parts of Africa. The move follows the World Health Organization's declaration of the Ebola/Bundibugyo virus disease outbreak in the Democratic Republic of the Congo and Uganda as a Public Health Emergency of International Concern (PHEIC) in May 2026. Developed in collaboration with the Ministry of Health and Family Welfare, the portal requires arriving international travellers to submit an online health declaration detailing their recent travel history, exposure risks and symptoms before immigration clearance. The system enables real-time data sharing with health, immigration and surveillance authorities for quick identification of at-risk passengers. Travellers can complete the Air Suvidha Self-Declaration Form up to 24 hours before arrival in India and are advised to submit it before boarding for faster clearance on arrival.

India's Hub-And-Spoke Aviation Vision Takes Off from Varanasi

India's ambitious hub-and-spoke aviation model has officially taken off with Varanasi becoming the first city to be integrated into the new "Easy Connect" system. The model links "spoke" cities such as Varanasi with major "hub" airports like Delhi, enabling passengers to access a wider international network through coordinated connections. It allows travellers to check in baggage and complete immigration at the origin airport, reducing transit hassles and travel time. Civil Aviation Minister Shri K. Ram Mohan Naidu said the launch from Varanasi is the beginning of a broader rollout aimed at improving international connectivity from Tier-2 and Tier-3 cities. Six more cities are expected to be brought under the model in the coming weeks, expanding access to global destinations beyond the metros.

NMCG Expands Urban River Plans Across 60 Ganga Basin Cities

The National Mission for Clean Ganga (NMCG), in collaboration with the National Institute of Urban Affairs (NIUA), has expanded Urban River Management Plans (URMPs) across around 60 cities in the Ganga Basin under the Namami Gange Programme. According to the Ministry of Jal Shakti, URMPs have been completed for 13 cities, while plans are under preparation for 27 cities under Phase-I and 33 cities under Phase-II. The initiative aims to integrate river health with urban planning through measures such as pollution control, flood management, wetland restoration, riverfront development and citizen participation. Interventions identified through the URMP process include nature-based solutions, ecological restoration, innovative technologies and community-centric approaches to address urban river challenges and improve the health of river ecosystems.

Govt. Reaffirms Safety of Ethanol Blending Programme

The government has reiterated that the Ethanol Blending Programme is scientifically validated and continuously monitored, rejecting what it described as misleading claims circulating on social media about Ethanol Blended Petrol (EBP). It said the programme is being closely tracked in consultation with oil marketing companies, automobile manufacturers, fuel testing agencies and other stakeholders to ensure safety and performance standards. The government further stated that since the introduction of E20 petrol, no widespread incidents of engine failure or vehicle breakdown have been reported that can be attributed to ethanol blending.

India's Trade Grows 5.4% to \$1.84 Trillion in FY 2025-26

India's total merchandise and services trade expanded by 5.4 per cent year-on-year during FY 2025-26, reaching 1.84 trillion US dollars. Exports grew by 4.2 per cent, while imports increased by 6.5 per cent, reflecting continued dynamism in the country's engagement with the global economy. These findings were highlighted in the eighth edition of NITI Aayog's *Trade Watch Quarterly* report for the fourth quarter (January-March 2026), released by Vice-Chairman Dr Ashok Kumar Lahiri in New Delhi on June 23. The report noted that India's external sector remained resilient despite persistent global economic and geopolitical uncertainties. Services trade continued to be a key driver of growth, with services exports rising 9 per cent during the January-March quarter and helping maintain a strong services surplus. India also retained its position as the world's eighth-largest services exporter in 2025.

Private Corporate Sector Rebounds with 10.1% Sales Growth in 2025-26

India's listed private non-government non-financial companies recorded a robust 10.1 per cent growth in sales during 2025-26, marking a return to double-digit expansion after two years, according to a Reserve Bank of India (RBI) report. Based on the financial results of 4,278 listed companies, the RBI said the strong performance was led by the manufacturing sector, where sales growth accelerated to 10.8 per cent from 6 per cent a year earlier. Automobiles, electrical machinery, food and beverages, and chemicals were among the key drivers of growth. The services sector also maintained momentum, with IT companies reporting sales growth of 7.9 per cent and non-IT services firms sustaining double-digit growth. Despite higher input costs, manufacturing companies improved profitability, with operating profit growth rising to 10.3 per cent from 6 per cent in the previous year. IT firms posted operating profit growth of 10.7 per cent, reflecting continued strength in the sector.

Govt. Auctions 10 Critical Mineral Blocks in 7th Tranche

The Ministry of Mines has successfully auctioned 10 critical and strategic mineral blocks under the seventh tranche, marking further progress under India's Critical Mineral Mission. With this round, the total number of critical and strategic mineral blocks auctioned has reached 56 out of 88 offered so far, reflecting a success rate of over 63 per cent. The tranche included minerals such as graphite, rare earth elements, vanadium,

titanium, glauconite and rock phosphate. For the first time, critical mineral blocks in Gujarat, Uttarakhand and Telangana were auctioned, while exploration licence blocks were also allotted in Arunachal Pradesh, Uttar Pradesh and Odisha under the second tranche of such auctions. The Ministry said the initiative will boost domestic exploration and development of key minerals required for clean energy, electric mobility, electronics, defence and advanced manufacturing, while reducing India's import dependence and strengthening supply chains under the National Critical Mineral Mission.

12 Indians Among 13 Dead in Qatar Gas Plant Blast

At least 12 Indian nationals were among 13 people killed in an explosion at Qatar's Ras Laffan liquefied natural gas (LNG) complex on June 22, 2026. The Indian Embassy in Qatar issued a statement on June 23, 2026, expressing condolences and confirming it was in contact with local authorities. Qatar's Energy Minister Mr. Saad al-Kaabi said a total of 13 people, including Indian and Pakistani nationals, lost their lives, while 66 others were injured in the incident. The blast occurred during the restart of operations at the facility after a prior disruption, officials said. Authorities described it as a "technical accident" and ruled out sabotage, adding that an investigation has been launched. Officials further said the plant's export operations were not affected and there was no environmental risk. Injured workers are undergoing treatment, with none reported to be in critical condition.

BRICS NSA Meet Calls for Stronger Action Against Terror, Cyber Threats

The 16th BRICS National Security Advisers' Meeting, held in New Delhi on June 16-17, 2026 under India's chairship, concluded with member nations calling for deeper cooperation to counter terrorism, cyber threats and other emerging global security challenges. Chaired by National Security Adviser Ajit Doval, the two-day meeting brought together top security officials from BRICS countries, who agreed to strengthen information sharing, enhance capacity-building and improve coordination among law enforcement agencies to tackle cross-border threats. Delegates also reviewed the outcomes of BRICS Joint Working Groups on Counter-Terrorism (held on May 21-22, 2026) and Security in the Use of Information and Communication Technologies (held on June 8-9, 2026), and discussed broader risks including energy security, food security and climate-linked instability. The meeting concluded with support for India's BRICS Chairmanship theme for 2026 - *Building for Resilience, Innovation, Cooperation and Sustainability* - highlighting the need for collective action against evolving security challenges.
