

# ARTS, HUMANITIES AND SOCIAL SCIENCES

# COURSE DESCRIPTION

The skills acquired in the field of Arts & Humanities are always polished and can be used in various sectors that work individually and in groups. Humanities are academic disciplines that study aspects of human society and culture. The humanities study how people process and document the human experience. Since humans have been able to do this, we have used philosophy, literature, religion, art, music, history, and language to understand and record our world. These modes of expression have become some subjects that traditionally fall under the humanities umbrella. Knowledge of these records of human experience makes us feel connected to those who have come before us and our contemporaries.
